- Research
- Community Management

---

## PROJECTS

### HOSPITAL INFORMATION MANAGEMENT SYSTEM

- Led the design and development of a web-based hospital Management Information System.
- Implemented wireframes for the project user interface
- Designed and developed the database structure for the project

<https://github.com/phillipmugisa/Med-Tech-HMIS>

### E-COMMERCE AUTOMATION WEBAPP

- This is a project that enables a user to perform a search for a given product on multiple e-commerce platforms (amazon, eBay, Jumia) using one search bar

<https://github.com/phillipmugisa/ecommerce-automation>

### NEWS SCRAPPING WEBAPP

- The project focus on web scrapping of news articles from popular new platforms. It gives a user the ability to view and filter through articles from different new platforms, based on news categories, all in one place.
